**FOR IMMEDIATE RELEASE**

**Intuicom Announces BroadbandPro Enterprise, Advanced Management Software for Wireless Networks.**

**New Breakthrough Software Features More than Two Dozen Industry Firsts.**

**Boulder, CO (April 9, 2013)** –Intuicom Inc., a leading provider of high-performance industrial wireless solutions, has announced their next version of management software for Intuicom wireless networks: BroadbandPro™ Enterprise.

BroadbandPro Enterprise allows users to configure, optimize and monitor Intuicom broadband networks more easily than ever, yet provides the most powerful suite of monitoring and feedback tools in the Industry.

BroadbandPro Enterprise will debut at the International Transportation Society of America's 2013 annual meeting and exposition in Nashville, Tennessee April 22 and 23.

Some of the unique features in this program include "Drag and Drop" radio programming and map positioning, and a comprehensive Alarms Center with options to monitor ping latency, RSSI, Sign-to-Noise ratio, transmit CCQ, receive CCQ, transmit rates, and receive rates. Other exclusive features include event logging, a high-performance mapping engine, unprecedented ability to sort radios, and a new Reports Center.

"This version of BroadbandPro is truly enterprise-ready," stated Joe Tradii, Intuicom Director of Marketing and Product Management. "It is designed to provide the user with the ultimate in performance feedback. No other software makes it easier to deploy wireless networks or allows users to see real-time feedback, for both transmit and receive directions, at-a-glance. We've also re-engineered the entire product to increase performance while at the same time greatly reducing system resource requirements," Tradii concluded.

BroadbandPro Enterprise is slated to be released in Q2 of 2013.

**About Intuicom, Inc.** - Intuicom provides wireless data solutions designed to satisfy the most demanding requirements for long-range remote or mobile device networking. Intuicom provides unsurpassed performance and flexibility. Founded in 1999, with headquarters in Boulder, Colorado, Intuicom solutions enhance applications including intelligent transportation, precision GPS, traffic control, and automation.
