**City of Denver Selects Intuicom Wireless Solutions for Student Safety Initiative**

*Wireless Communication Network Critical to New ATMS*

**Boulder, CO – (June 30, 2017)** – Intuicom®, Incorporated, a premier supplier of wireless solutions to the Traffic and Intelligent Transportation Systems (ITS) market, announced today that the City of Denver, Colorado has chosen Intuicom’s wireless solutions (both Broadband as well as 900 MHz Serial/Ethernet products) as the communications foundation supporting the City’s student safety initiative. In response to the high cost and extended time of physically connecting Denver’s network of school zone flashing beacons, the City elected to deploy a wireless solution that can be controlled remotely. The award was made in conjunction with Intuicom’s distribution partner, Econolite Control Products.

“The safety of our children is a priority we all understand and embrace,” comments Tom Foley, CEO and president, Intuicom, Inc. “With the remote control functionality of our devices, administrators are freed from pre-timed configurations and can adjust timing and operation remotely for increased convenience, responsiveness, and, in turn, effectiveness.”

Cost, convenience and scalability were three major motivators influencing the City’s decision to deploy wireless communications into their school zone traffic control strategy. The award will support the Advanced Traffic Management System (ATMS) that was recently awarded to Intuicom’s partner, Econolite Control Products.

**About Intuicom, Inc.**

Intuicom provides wireless data solutions designed to satisfy the most demanding requirements for long-range remote or mobile device networking. Intuicom provides unsurpassed performance and flexibility. Founded in 1999, with headquarters in Boulder, Colorado, Intuicom Wireless Solutions enhance applications including traffic control, transportation, precision GNSS and automation.
