North Carolina DOT Selects Intuicom Wireless for State-Wide Contract
Multi-year Contract Specifies Intuicom's Broadband and Spread Spectrum Radios

Boulder, CO – (June 13, 2017) – – Intuicom®, Incorporated, a premier supplier of wireless solutions to the Intelligent Transportation Systems (ITS) market, announced today that the State of North Carolina Department of Transportation (NCDOT) has selected Intuicom for its wireless communications solutions. The award, made in conjunction with Intuicom's distribution partner, Rosenblatt & Associates, Inc. (RAI), encompasses a broad offering of Intuicom Wireless Solutions for the traffic and transportation projects throughout North Carolina.

"NCDOT was looking for a complete wireless solution, including software and hardware, engineered to meet the growing demands of their ITS projects," says David Clark, Regional Sales Manager for Intuicom, Inc. "Our intuitive management software, rapid deployment tools, and proven performance delivers the reliable wireless data communications network that the North Carolina DOT requires."

Intuicom's BroadBand Solutions (BBS) radios were selected for their extended range and secure, high capacity throughput providing the overriding framework for the State. Previously, NCDOT chose Intuicom's EB-6 PLUS high-speed wireless transceivers and Communicator II spread spectrum radios for their reliability, performance, and scalability. The combination ensures that the NCDOT has reliable and secure high speed wireless data communications network. This scalable wireless solution includes centralized monitoring and management of the communications network via Intuicom's renowned BroadBandPro™ Enterprise Management Software

Flexible and Secure Connectivity

At speeds up to 108Mbps, the Intuicom BroadBand Solutions are engineered to address the extended range and throughput requirements demanded by NCDOT's bandwidth intensive applications. Capable of operating as the access point, end-point, or repeater in point-to-point and point-to multipoint configurations, the EB-6 PLUS adds the flexible, multi-functional connectivity to round out the communications package.

Software So Unique it is Patented

Drag-and-drop network configuration, real-time bi-directional network link data, and a performance dashboard that intuitively communicates network performance parameters including ping latency, signal-to-noise ratio, and Tx/Rx CCQ, are just of few of the advanced features inherent in BroadbandPro™ Enterprise Management Software. There is simply no better way to automatically discover, configure and optimize your Intuicom wireless broadband network than with BroadbandPro™ Enterprise Management Software—so unique and powerful that it is patented.

About Intuicom, Inc.

Intuicom provides wireless data solutions designed to satisfy the most demanding requirements for long-range remote or mobile device networking. Intuicom provides unsurpassed performance and flexibility. Founded in 1999, with headquarters in Boulder, Colorado, Intuicom Wireless Solutions enhance applications including traffic control, transportation, precision GNSS and automation. You can learn more about Intuicom at www.intuicom.com.
